Re: Values for Quality Precast Lintels
DE Job #240850

Gentlemen:

Pursuant to your request, we have reviewed the load carrying capacities for the above listed brands of lintels. We also reviewed the enclosed table of values, which has been prepared by Quality Precast.

The table consists of the most conservative load carrying capacities for the above listed brands of lintels. Our office has performed the load carrying capacity calculations for Lotts, Wekiwa and Commercial Concrete precast lintels.

In our professional opinion, the enclosed tables represent the safe load carrying capacity and are acceptable for use with all three brands of precast lintels.

As always, please contact us if you have any further questions.

Sincerely,

DANSCO ENGINEERING, P.A.

Thuy H. Huynh, P.E.
